Mr. Miller:

I hope your arm is feeling better and wish you a speedy recovery. Below is an update regarding the status of work at Gulfco Marine. It is sounding like they should complete pore water sample collection by this Saturday, and will be wrapping up the field effort on Monday with the collection of one surface water sample at the one location that currently contains water.

Please let me know if you have any additional questions or comments concerning these matters.

Thank You,
Mark Paddack
EA Project Manager

Thanks!

Surface water will only be collected at one location - the others are too dry to allow sampling. Hope that helps!

9543106

We completed 2 pore water samples today. The plan is to do two of the wetter locations remaining tomorrow and one each of the two remaining drier locations on Friday and Saturday. Monday will be ~ 1/2 day of surface water sample collection.
